

**Rockaway Borough Schools
District Goals for 2017-18**

1. The district will allocate funds and support for the pilot of a 1:1 student device initiative. Funding will be sought through multiple sources, including operating funds and grant funds. Support will include professional development for staff, training for parents and students, and the development of policies and procedures to govern how students should appropriately use the devices to enhance their academic programs.
2. District administrators, elementary teachers and math teachers will continue to review and evaluate the district math programs, including curriculum, pacing guides, assessments, and district-provided resources. Resource access will be improved to provide teachers with increased access to data and innovative, web-based, instructional resources.
3. District administrators and teachers will implement a system of professional learning communities to drive professional growth and responsive teaching. The implementation of PLCs will also bring the district into compliance with newly established statutory and regulatory guidelines.
